

Outdoor learning day - Year 4

Year 4 made the most of the outdoors to enhance their learning in many different subjects.

Science: We visited Forest School to identify invertebrates using a classification key.

Geography: Our walk to Chinnor's Old Kiln Lakes enabled the children to learn something new about their local area as well as having an opportunity to consider how the area could be improved to create better habitats for the local animals they had been studying.

Maths: Using 2D shapes, the children created symmetrical designs in the school grounds.
